WARNING NOTICE
You have reached a Department of Defense (DoD) computer system or data base, used solely by the U.S. Government, its officers, and agents. It is a violation of U.S. Code, Title 18 to access and use U.S. Government computer resources without specific authorization. Each access is subject to recording and auditing. Without specific authorization from the U.S. Government, you are an intruder. Intruders are subject to criminal prosecution, fine, and/or imprisonment. All DoD computer systems are subject to monitoring at all times to ensure proper functioning of equipment and systems, including security devices, to prevent unauthorized use and violations of statutes and security regulations, to deter criminal activity, and for other similar purposes. If monitoring of this or any other DoD computer system reveals possible evidence of violation of criminal statutes, this evidence and any other related information, including identification information about the user, may be provided to law enforcement officials.
UNCLASSIFIED, NON-SENSITIVE, NON-PRIVACY ACT USE ONLY
This Department of Defense (DoD) computer system is provided as a service by the CIVFORS System. It is intended to be used by CIVFORS users only. Unauthorized attempts to retrieve information, view information, upload information or change information on this service are strictly prohibited and may be punishable under the Computer Fraud and Abuse Act of 1986.

Data Mining
CIVFORS Forecast Viewer offers you presentation quality tabular and graphical displays of forecasts on projected voluntary separations, retirements, involuntary separations, accessions, reassignments, etc. by a number of data elements user wish to view e.g., projected retirements for civil engineers in federal government. Select multiple forecast for comparative analyses on the same or different workforce models. Five years of historical data are included with projection results.
CIVFORS Forecast Builder offers you the option to customize baselined forecasts. Adjust historical rates on gain, loss or reassignment actions. Add constraints to model personnel policies or meet long-term strategic goals.
Data mining analytics help users test models they wish to use and provides feedback if test results show that the model needs improvement for better prediction.
